

What grade level do you teach?

Where do you teach?

How many students will you have this coming year?

How many years have you been teaching?

Pre-test

What is a marine microbe? Can you list some examples?

What is ecology?

What is dissolved oxygen (DO)? Why is it important? What biological and physical processes influence levels of DO in the oceans?

What is stratification in the ocean, and why is it important for nutrient and oxygen circulation?

On a scale of 1 to 5, please rate the importance of of the following statements:

I think that it is important for my students to learn about oceanography

1 2 3 4 5

Very important

Not important

My students are knowledgeable about oceanography

1 2 3 4 5

Very knowledgeable

Not knowledgeable

My students are interested in learning more about oceanography

1 2 3 4 5

Very interested

Not interested

This workshop increased my science knowledge

1 2 3 4 5

The presenters were well prepared

1 2 3 4 5

I found this workshop useful

1 2 3 4 5

I would recommend this workshop to a colleague

1 2 3 4 5

Please describe at least one thing you learned from this workshop

Please share any other comments you might have
